

Integrating SendGrid Service

The screenshot shows the Twilio SendGrid dashboard interface. At the top, a navigation bar includes the Twilio logo and the user's name, "Sai Siddhardha N.". Below this, a sidebar on the left contains a list of navigation items: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as new). The main content area features a welcome message, "Welcome, Sai Siddhardha!", followed by a prompt to follow setup steps. A prominent blue banner reads "Send your first emails with Twilio SendGrid". Below this, the "Create a sender identity" section explains the need for a sender identity and offers two options: "Create a Single Sender" (highlighted with a blue button) and "Authenticate a domain Instead". An illustration shows an email header with "Your Business" as the sender. The "Send your first email" section at the bottom states, "Please create a sender identity before sending your first email." A status bar at the very bottom shows a 100% reputation and a link to view account usage.

Welcome, Sai Siddhardha!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain Instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.
