Project Name	Project - CONTAINMENT ZONE ALERTING APPLICATION
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Step-1: Team Gathering, Collaboration and Select the Problem Statement

1
Define your problem statement

This application is intended to provide information about containment zones in a particular region by alerting people, through continuous monitoring of an individual's location. Key benefits of the application are monitoring people's activity and alerting them of their safety movements.

Step-2: Brainstorm, Idea Listing and Grouping

② Brainstorm

Write down any ideas that come to mind that address your problem statement.

⏱ 10 minutes

Sai Siddhardha Narisetty

> For the precise use of location and get prior alert messages

> We need to access the location while to see the alerted zones

> And they provide correct informations native zones

S V S Dheeraj Kumar

> We can send grid type of alert messages

> If the person encountered into the marked zones the alert messages are sent via mail

> Users can see the updated alert zones before moving to the destination point

Sai Reddy Dodda

> How can we push the notification to the user

> Can we send the alert messages through App notificaion

> If we want push the notification we need to provide the alerted zones

Somu Sampath Reddy

> User can share their status as public whether they affected or not

> User must keep updated of their app for better reliable of data

> User can access the nearby pharmacy with limited no.of tablets without Doctor prescription

Ujjini Vijay Kumar

We might face lot of challenges

We must develop both web & mobile application for the various kind of users

The alert messages should be some interactive

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕐 20 minutes

Importance

If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

And they provide correct informations native zones

And they provide correct informations native zones

And they provide correct informations native zones

And they provide correct informations native zones

We must develop both web & mobile application for the various kind of users

For the affected person profile, user can contact the Emergency services

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
